

**SCOTTISH ROCK GARDEN CLUB**  
**72nd SEED DISTRIBUTION**  
**2018 / 2019**

---

*Send requests for seeds to:*

Mr Neil McNulty  
6 Main Road  
Crookedholm  
Kilmarnock  
KA3 6JT  
Scotland

*Send 2019 seed donations to:*

Drs Ian & Carole Bainbridge  
Luckie Harg's  
Anwoth  
Gatehouse of Fleet  
Dumfries and Galloway  
DG7 2EF  
Scotland

Please read page 2 and the notes at the back

# Scottish Rock Garden Club

## 72nd Seed Distribution 2018 - 2019

### Seed Request Applications

- Please complete the forms in the centre of the booklet, and send these to Neil McNulty, or you can order online through the SRGC website ([www.srgc.net](http://www.srgc.net) - About Us).
- We have a new online seed ordering system. To order online, you must first register with your name and membership number.
- If you request seed on the paper forms, you must pay for seed by cash or cheque.
- If you order online you must pay online in Sterling, DEuros or US dollars.
- All seed requests must be received by January 15th.
- 2018/2019 seed donors and exchange helpers may choose 25 packets, non-donors 16 packets.
- Please follow the instructions carefully: write clearly to help us pick the items you want.
- The charge for the main request for all members is £5, €7, or \$10 US, to cover packing, postage and costs of the exchange.
- We no longer need a list from US, NZ or Australian members; the computer will generate one for your seed requests.

### Seed Distribution

- Distribution of seed starts in mid-January. First the donors' main requests, then non-donors', and finally the surplus seed.
- Main requests will be sent out in January, but surplus requests will be sent only after all main orders have been fulfilled. Your main and surplus seed will arrive separately.
- US members: please send all your paperwork with the request form (see centrefold page i) unless this was sent with your seed donation.

### Phytosanitary restrictions outside the EU

- US members should not choose any items marked with a black star ★, as these seeds are not permitted entry into the USA.
- We cannot send live material to members outside the EU. This is marked ♠ in the list.

### About the list

- We rely on the donor's naming of seed for the Exchange so we cannot guarantee accuracy in naming. Be aware that named cultivars and varieties rarely come true, so seed of any named variety should be considered as 'ex' that variety.
- The sequence in the list is Genus: hyb/sp.: named varieties: then species: subspecies: variety: form: description. Some unknown species are listed as sp., and spp. means that there is a mixture of species of that genus.
- This Seed List will remain on the SRGC website for the future, so you will be able to check packet numbers in the future.
- Wild seed: There has been much discussion about illegal collecting of wild seeds. SRGC is not able to check every seed submission, but asks donors only to contribute wild-collected seed collected in accordance with the laws of the source countries and whose distribution is allowed under the terms of any permit to collect seed.

### The Nagoya Protocol

- Genetic material collected from the wild since October 12th 2014 is covered by the Nagoya Protocol, which is legally binding in the EU, including the UK. For material from signatory countries, unless there is written consent from the country of origin, 'utilization' is not permitted.
- 'Utilization' includes the development of new named cultivars and hybrids as well as production of new drugs and other products.
- Straightforward cultivation, privately or commercially, is permitted.
- Unless explicitly stated otherwise, seeds in this list do not have consent for 'utilization' as described above.

Ian and Carole Bainbridge

## GARDEN SEED

ABELMOSCHUS (mal)	40	carmichaelii 'Arendsii Group'	81	coddii
1 manihot *	41	hemsleyanum	82	inapertus

## WILD COLLECTED SEED

We are indebted to those who take the considerable trouble to collect seed in the wild. Collectors are assigned a number, and these are shown against the entry for the species. You may select a collector number – write eg 5030(20) on the request form. The collector's number will be written on the packet where a choice has been made, and we may be able to provide more collection details on request.

**Note that not all wild-collected seed is in alphabetical order** due to some late –arriving donations.

# Notes

## In this exchange....

Interesting items in the exchange this year are better than usual offers of Liliium, Narcissus and garden and wild Penstemon, new gentian hybrids from Michael Kammerlander and a good range of Drosera species. Why not try some of these?

## Naming of plants

We use:

**The Plant List** ([www.theplantlist.org](http://www.theplantlist.org)) as our first source to check species information.

**IPNI** ([www.ipni.org](http://www.ipni.org)) is also very useful.

**RHS Search tool** ([www.rhs.org.uk/plants/search-Form](http://www.rhs.org.uk/plants/search-Form)) is first for garden varieties.

A **Google** search is also valuable to us.

The Plant List tends to lump subspecies; we tend to be more generous and leave the subspecific names in the list if the donor has provided one.

We use specific books: **Primula** (Richards), **The World of Crocus** (Ruksans), **Meconopsis for Gardeners** (Grey-Wilson), **Saxifrages** (McGregor), as well as specialist websites to help with naming.

## Changing Genera

Over time and taxonomy, genera change.

### In this list:

Cortusa = Primula

Disporum – most are in Prosartes

Galtonia = Ornithogalum

Ipheon – also look at Tristagma

Leucojum – almost all in Acis

Lychnis – mostly look at Silene

*Meconopsis napaulensis* = *M. x complexa*

Merendera = Colchicum

Nectaroscordium – mostly in Allium

Podophyllum – mostly in Dysosma,

Sinopodophyllum

Polyxena = Lachenalia

Smilacina = Maianthemum

Symphandra = Campanula

**We have not** merged Dionysia or Dodecatheon into Primula,

**We have retained** Meconopsis for all except *Cathcartia villosa* and *Parameconopsis cambrica*.

**We have not** merged Pulsatilla into Anemone.

## What's in an Exchange?

The SRGC Seed Exchange has been working away: here are this year's stats, which are amazingly similar to last year. This year 354 donors provided almost 7300 packets of seed. Three fantastic

donors provided over 100 packets each. Thankyou to all donors, including the 32 new donors – welcome and thanks to you!. This creates a list with over 4200 numbers on it. 12 people helped with the seed collation, almost 70 with the seed packeting and 30 will help with the distribution of around 1400 requests. We hope you like and benefit from the results of all these contributions.

## Collector numbers: remember your 'Ex'es

We list original collector numbers on garden-collected seed from wild origin when they are provided by the donor. This seed is actually 'ex-' the collection number, but recipients will be able to trace the origins of the plants they are trying to grow. So, please add the full collector number if you have it. However, there is no point in adding "ex-JCA" or the like to the list without the full number, and in general we do not do this.

Remember also that named varieties and cultivars rarely come true, so seed of any named variety in the list should be considered as 'ex' that variety.

In some cases, seed is listed as 'ex' a country or location. This means that garden-grown plants are known to originate from that location (however long ago). We list this when we think this may be relevant, but don't expect to see Cyclamen graecum ex Greece!

## Dry seed please.....

Please be really careful to dry your seed before sending it to us. Moist seed in plastic envelopes has a real risk of going mouldy; and we simply cannot use that in the exchange. Please use paper or glassine envelopes in preference, or ensure all your seed is really dry if it's going into a plastic self-seal envelope.

## What will we leave out of the list?

Some donations, very few, have been left out of the list. These include a very few serious weed and invasive species, and un-hardy garden annuals. In general, please bear in mind that we are a club interested in hardy plants. We list interesting trees and shrubs, herbaceous perennials and alpines, but feel we do have to draw the line somewhere.
