

SCOTTISH ROCK GARDEN CLUB

2019 / 2020

73rd SEED DISTRIBUTION

Send requests for seeds to:

**Mr Neil McNulty
6 Main Road
Crookedholm
Kilmarnock
KA3 6JT
Scotland**

Send 2020 seed donations to:

**Drs Ian & Carole Bainbridge
Luckie Harg's
Anwoth
Gatehouse of Fleet
Dumfries and Galloway
DG7 2EF
Scotland**

Please read page 2 and the notes in the Yearbook

Instructions, Notes and News

Applying for Seed

- Please complete the forms in the centre of the booklet, and send these to Neil McNulty, or you can order online through the SRGC website (www.srgcseed.net or www.srgc.net - About Us).
- To order online for the first time, you must register with your name and membership number. If you registered last year, sign in using your existing password and email address.
- If you request seed on the paper forms, you must pay for seed by cash (£ USD or Euros) or Sterling cheque.
- If you order online you must pay online in Sterling or Euros.
- All seed requests must be received by **January 13th 2020**. Note this is two days earlier this year.
- 2019/20 seed donors and exchange helpers may choose 25 packets, non-donors 16 packets.
- Please follow the instructions carefully: write clearly to help us pick the items you want.
- The charge for the main request for all members is £5, €7, or \$10 US, to cover packing, postage and costs of the exchange.
- We no longer need a list from US, NZ or Australian members; the computer will generate one for your seed requests.

Seed Distribution

- Distribution of seed starts in mid-January. First the donors' main requests, then non-donors', and finally the surplus seed.
- Main requests will be sent out in January, but surplus requests will be sent only after all main orders have been fulfilled. Your main and surplus seed will arrive separately.
- US members: please send all your paperwork with the request form (see centrefold page i) unless this was sent with your seed donation.

Phytosanitary and import restrictions

- US members should not choose any items marked with a black star ★, as these seeds are not permitted entry into the USA.
- We cannot send live material to members outside the EU. This is marked ♠ in the list.

- Last year, Japan introduced a requirement for phytosanitary certification of all seed imports to Japan. We can provide these but will have to pass on the (expensive) charges of the UK plant health authorities for doing so.
- Please be aware of any regulations relating to your country when ordering seed. The Australian authorities are increasingly returning whole orders when non-permitted items are amongst the order.
- There has been much talk about a new plant health directive from the EU. As far as we can ascertain, this will not affect sending seed to members, and import of seed to the UK will continue under the existing regulations, but we will keep you informed of any further changes.

About the list

- We rely on the donor's naming of seed for the Exchange so we cannot guarantee accuracy in naming.
- The sequence in the list is Genus: hyb/sp.: named varieties: then species: subspecies: variety: form: description. Some unknown species are listed as sp., and spp. means that there is a mixture of species of that genus.
- This Seed List will remain on the SRGC website for the future, so you will be able to check packet numbers when you lose this list!
- Wild seed: There has been much discussion about illegal collecting of wild seeds. SRGC is not able to check every seed submission, but we ask donors only to contribute wild-collected seed collected in accordance with the laws of the source countries and whose distribution is allowed under the terms of any collection permit.
- We list collector numbers on garden-collected seed of wild origin when provided by the donor. This will enable you to trace the origins of these plants. So, please add the full collector number if you have it, but there is no point in adding "ex-JCA" or the like to the list, and in general we do not do this.
- Named varieties and cultivars often do not come true, so seed of any named variety in the list

should be considered as 'ex' that variety.

- When we think it valuable, we list seed as 'ex' a country or location. These are garden-grown plants known to originate from that location (however long ago).

The Nagoya Protocol

- Plant (genetic) material collected from the wild since October 12th 2014 is covered by the Nagoya Protocol, which is legally binding in the EU, including the UK. For material from signatory countries, unless there is written consent from the country of origin, 'utilization' of these plants is not permitted.
- 'Utilization' includes the development of new named cultivars and hybrids as well as production of new drugs and other products.
- Straightforward cultivation, privately or commercially, is permitted.
- Unless explicitly stated otherwise, seeds in this list do not have consent for 'utilization' as described above.

Notable in this exchange....

This has been a fantastic year for wild donations from New Zealand and the western USA; the best for years. Also in the exchange this year are better than usual offers of *Calochortus*, and *Corydalis* (from the national collection). *Gladiolus* and *Viola* seem to be increasingly popular, and we have good donations of *Lachenalia*, *Narcissus* and both garden and wild *Penstemons*. Why not try some of these?

Naming of plants

We are in the process of moving to use *Plants of the World Online*: www.plantsoftheworldonline.org as our first source of name checking, replacing *The Plant List* www.theplantlist.org (previously our first source), as TPL is no longer being updated. *IPNI* www.ipni.org is also very useful. The *RHS Search* tool www.rhs.org.uk/plants/search-Form is our first stop for garden varieties, and a **Google** search is often also valuable.

POWO and TPL tend to lump subspecies; we tend to be more generous and leave the subspecific names in the list if the donor has provided one. We use genus specific books: *Primula* (Richards), *The World of Crocus* (Ruksans), *Meconopsis for Gardeners* (Grey-Wilson), and *Saxifrages* (McGregor), as well as specialist websites (eg the Cyclamen Society) to help with naming.

Changing Taxonomy

Over time, taxonomic reviews mean that families and genera change, and the move to POWO will accelerate this for a while.

In this list:

Disporum – most are in *Prosartes*

Galtonia = *Ornithogalum*

Leucojum – almost all in *Acis*

Lychnis – mostly in *Silene*

Meconopsis napaulensis = *M. x complexa*

Merendera = *Colchicum*

Nectaroscordium – mostly in *Allium*

Podophyllum – see *Dysosma*, *Sinopodophyllum*

Smilacina = *Maianthemum*

We have not merged *Dionysia* or *Dodecatheon* into *Primula*.

We have retained *Meconopsis* for all except *Papaver cathcartia* and *Parameconopsis cambrica*.

We have not merged *Pulsatilla* into *Anemone*.

We expect more changes next year as we adopt POWO more comprehensively. For a list of plant family codes see the back pages.

What's in an Exchange?

This year's statistics are similar to last year. This autumn 328 donors provided almost 7000 packets of seed. Five fantastic donors provided over 100 packets each. Thankyou to all donors, including the 34 new donors – welcome and thankyou! This has generated a list with over 4150 numbers. 12 people helped with the seed collation, almost 70 with the seed packeting and 30 will help with the distribution of around 1400 requests.

Dry seed please.....

Please be really careful to dry your seed before sending it to us. Moist seed in plastic envelopes often goes mouldy; and we cannot use that in the exchange. Please use paper or glassine envelopes, or ensure all your seed is really dry if it's going into a plastic self-seal envelope.

What do we leave out of the list?

A very few donations have been left out of the list. These include serious weed and invasive species, and non-hardy garden annuals. Please bear in mind that we are a club interested in hardy plants. We list interesting trees and shrubs, herbaceous perennials and alpins, but do have to draw the line somewhere.

Ian and Carole Bainbridge

WILD COLLECTED SEED

We are indebted to those who take the considerable trouble to collect seed in the wild. Collectors are assigned a number, and these are shown against the entry for the species. You may select seed from a particular collector– write their number in brackets - eg 5030(20) - on the request form. The collector's number will be written on the packet where a choice has been made, and we may be able to provide more collection details on request.

5326 harrimaniae nana — 6
ZIZIA (api)
5327 aurea — 20

LIST OF PLANT FAMILIES

Each genus in the seed lists above has a three letter code for its plant family. The three letter code is the first three letters of the family name unless there is duplication, in which case a different code is shown for each family. The families follow the nomenclature used in *Plants of the World Online* - www.plantsoftheworldonline.org

Acanthaceae		Capparaceae	cpp	Gesneriaceae	
Acoraceae		Caprifoliaceae	cap	Ginkgoaceae	
Actinidiaceae		Caryophyllaceae		Gleicheniaceae	
Aizoaceae		Casuarinaceae		Goodeniaceae	
Alismataceae		Celastraceae		Grossulariaceae	
Alstroemeriaceae		Cercidiphyllaceae		Gunneraceae	
Amaranthaceae	amn	Cistaceae		Haemodoraceae	
Amaryllidaceae	ama	Cleomaceae	cle	Haloragaceae	
Anacampserotaceae	ana	Clethraceae	clt	Hamamelidaceae	
Anacardiaceae	anr	Chloranthaceae		Hydrangeaceae	hyd
Annonaceae		Colchicaceae	col	Hydrocharitaceae	hyo
Apiaceae		Columelliaceae	clm	Hymenophyllaceae	
Apocynaceae		Commelinaceae		Hypericaceae	hyp
Aquifoliaceae		Convolvulaceae		Hypoxidaceae	hyx
Araceae	ara	Coriariaceae	coi	Iridaceae	
Araliaceae	arl	Cornaceae	cor	Isoetaceae	
Araucariaceae	aru	Costaceae		Iteaceae	
Arecaeae		Crassulaceae		Ixioliriaceae	
Argophyllaceae		Cucurbitaceae		Juglandaceae	
Aristolochiaceae		Cunoniaceae		Juncaceae	jun
Asparagaceae	asp	Cupressaceae		Juncaginaceae	jng
Asphodelaceae	ash	Cyatheaceae		Lamiaceae	
Aspleniaceae	apl	Cyperaceae		Lardizabalaceae	
Asteliaceae	asl	Daphniphyllaceae		Lauraceae	
Asteraceae	ast	Datisceae		Lentibulariaceae	
Atherospermataceae		Dennstaedtiaceae		Liliaceae	
Balsaminaceae		Diapensiaceae		Limnanthaceae	
Begoniaceae		Dilleniaceae		Linaceae	lin
Berberidaceae	ber	Dioscoreaceae		Linderniaceae	lid
Berberidopsidaceae	bed	Doryanthaceae		Loasaceae	
Betulaceae		Droseraceae		Loganiaceae	
Biebersteiniaceae		Elaeagnaceae	elg	Lycopodiaceae	
Bignoniaceae		Elaeocarpaceae	ela	Lythraceae	
Blandfordiaceae		Elatinaceae	elt	Magnoliaceae	
Boraginaceae		Ephedraceae		Malpighiaceae	map
Brassicaceae		Ericaceae		Malvaceae	mal
Bromeliaceae		Escalloniaceae		Marantaceae	maa
Bruniaceae		Euphorbiaceae		Marsileaceae	mar
Buxaceae		Fabaceae		Mazaceae	
Cactaceae		Francoaceae	fra	Melanthiaceae	mel
Calceolariaceae	cal	Frankeniaceae	frk	Melastomataceae	mes
Calycanthaceae	cly	Garryaceae		Meliaceae	mei
Calyceraceae	cce	Gelsemiaceae		Menyanthaceae	
Campanulaceae		Gentianaceae		Molluginaceae	
Cannaceae		Geraniaceae		Montiaceae	

Moraceae		Piperaceae		Saxifragaceae	
Musaceae		Pittosporaceae		Schisandraceae	
Myricaceae	myc	Plantaginaceae		Scrophulariaceae	
Myrtaceae	myr	Plumbaginaceae		Smilacaceae	
Nartheciaceae		Poaceae		Solanaceae	
Nepenthaceae		Podocarpaceae		Stachyuraceae	stc
Nitrariaceae		Polemoniaceae	pol	Staphyleaceae	sta
Notofagaceae		Polygalaceae	plg	Stylidiaceae	sty
Nyctaginaceae		Polygonaceae	pog	Styracaceae	str
Nymphaceae		Polypodiaceae	pop	Symplocaceae	
Nyssaceae		Pontederiaceae		Talinaceae	
Ochnaceae		Portulacaceae		Taxaceae	
Oleaceae		Primulaceae		Tecophilaeaceae	
Onagraceae		Proteaceae		Theaceae	
Ophioglossaceae		Pteridaceae		Thymelaeaceae	
Orchidaceae		Ranunculaceae		Tofieldiaceae	
Orobanchaceae		Resedaceae	res	Tropaeolaceae	
Osmundaceae		Restionaceae	ret	Typhaceae	
Oxalidaceae		Rhamnaceae		Ulmaceae	
Paeoniaceae		Rosaceae		Urticaceae	
Papaveraceae		Rousseaceae		Velloziaceae	
Passifloraceae		Rubiaceae		Verbenaceae	
Paulowniaceae		Rutaceae		Viburnaceae	
Pennantiaceae	pen	Sabiaceae		Violaceae	
Penthoraceae	pet	Salicaceae	sal	Vitaceae	
Philesiaceae		Salviniaceae	sav	Winteraceae	
Phrymaceae		Santalaceae		Xeronemataceae	
Phyllanthaceae	phl	Sapindaceae	sap	Xyridaceae	
Phytolaccaceae	phy	Sapotaceae	spt	Zingiberaceae	
Pinaceae		Sarraceniaceae
